The Bronzeflex doctor blade provides excellent roll surface cleaning, due to the sharp blade edge, without the concern of using some of the harder metal blades on more sensitive roll covers. The bronze alloy provides a corrosion-resistant material which is useful in harsh application conditions.

**Overview**

**Features**
- Bronze alloy
- Thicknesses: 0.035” (0.9 mm) to 0.050” (1.4 mm)

**Benefits**
- Corrosion resistant
- Excellent cleaning
- Sharp, clean doctoring edge

**Applications**
- Dryers
- MG cylinders
- Calender rolls
- Yankee cylinders
- Reel drums
