**Overview**

**Applications**

The MiniDoc scraper assembly provides a new, cost-effective scraper technology for various industrial applications. Many roll and belt cleaning applications require a blade scraper design that is both compact and at the same time provides excellent cleaning results to improve uptime and reduce maintenance costs.

**Features**

- Lightweight aerospace alloy construction
- Compact design fits into tight locations
- Applicable up to 400°F duty
- Large selection of blade materials

**Benefits**

- Effective cleaning at minimal blade pressure
- Quick blade change design only takes seconds to change a blade
- Low maintenance

**Kadant experience**

Kadant has been a global market leader in doctoring systems and technologies for more than 80 years. During that time, our doctor assemblies and diverse family of carbon fiber, composite, and metal doctor blades have earned a reputation for high precision, efficiency, and reliability. Our field engineers are trained to identify roll doctoring problems and provide cost-effective solutions that provide the user the opportunity to increase efficiency and productivity.
