The UniMate blade holder represents the latest innovation in composite blade holder manufacturing. Composites allow for a lightweight, economical, and corrosive resistant holder less susceptible to acids and chemicals commonly used in the paper industry. The UniMate blade holder is designed to accept all Kadant doctor blade materials and sizes, allowing for use across multiple machine positions.

**Overview**

**Features**
- Accepts all blade materials and thicknesses
- Micro adjusting screws enable precise blade fit
- Lightweight yet rugged composite material
- Acid and chemical resistant
- Operating temperature of 302º F (150º C)

**Benefits**
- Versatile, economical, and simple to install
- Retrofitting possible
- Easy blade changing
- Precise fit for uniform cleaning

**Applications**
- Breast rolls
- Wire and felt rolls, dryer cylinders
- Calender and reel drums
