UniTek™ Doctor Blades

Glass Epoxy Blade

**Applications**

Kadant’s UniTek doctor blade provides a versatile design makes it ideal for heavy-duty cleaning and sheet shedding applications. It is especially well suited for tough cleaning applications where stickies and pitch are a problem.

**Features**

- Fiberglass with enhanced epoxy resin
- Maximum temperature: 400° F (200° C)
- Available thickness: 0.055" (1.4 mm)

**Benefits**

- Increased life over standard glass fiber blades
- Excellent for very tough cleaning applications for stickies and pitch
- Extra strength for sheet shedding applications

**Applications**

- Wet end rolls
- Press rolls
- Dryer cans
- After-coater dryers
- Last top dryers

**Kadant experience**

Kadant has been a global market leader in doctoring systems and technologies for more than 80 years. During that time, our doctor assemblies and diverse family of carbon fiber, composite, and metal doctor blades have earned a reputation for high precision, efficiency, and reliability. Our field engineers are trained to identify machine doctoring problems and provide cost-effective solutions that provide the papermaker the opportunity to increase efficiency and productivity.
