

Single Unit Hydrocyclones

Applications

CLP hydrocyclones and hydrocyclone parts are designed to replace Cleanpac® brand hydrocyclones. The CLP 350 series feature the same operating parameters as the OEM hydrocyclones and can easily be installed in the same bank or canister.

Features

- ▶ Improved design with fewer parts
- ▶ Easy assembly and re-assembly (V-band clamp)
- ▶ No threaded parts (bank model)
- ▶ "No-plug" design with ribbed lower cone
- ▶ Improved wear indicator and clean-out plug

Benefits

- ▶ High fiber recovery
- ▶ Minimized cost of ownership
- ▶ Reduced maintenance time
- ▶ Increased runnability
- ▶ Less plugging

Replacements for Cleanpac® 350 Series

Process knowledge, process expertise

Our decades of experience using Kadant Noss hydrocycloning systems has led to our replacement concepts for OEM parts. The Kadant solution features CLP complete single unit hydrocyclones and hydrocyclones parts that are designed with fewer components, offer easy re-assembly, and can be used in existing banks or canisters.
